

FAJAR AZIZ KURNIAWAN

WEBSITE DEVELOPER

Asrama Ex Brigif 5 Jangli Semarang | jrzfjr5@gmail.com | jariz-portofolio.vercel.app

SUMMARY

Fullstack Developer with a lot of experience making systems that are fast and can grow using TypeScript (NestJS, Next.js, React.js) and Golang. Freelance development experience and a promise to provide reliable end-to-end technical solutions. Currently working on real-world projects while working toward a degree in computer science. Excited to use my skills in database management, API architecture, and modern frontend development to help dynamic engineering teams.

PROFESSIONAL EXPERIENCE

Logika Data | Semarang, Indonesia — FullStack Developer

December 2025 – October 2026

- Developed and maintained fullstack web applications using Next.js for the frontend and NestJS for the backend, delivering scalable business solutions for MSMEs (UMKM).
- Designed and managed relational databases using MariaDB and PostgreSQL to ensure reliable data storage and efficient query performance.
- Built and enhanced a Point of Sale (PoS) system to streamline transaction processing and sales reporting for retail clients.
- Developed a backoffice management system for inventory, order tracking, and operational administration, improving business process efficiency.

Raznar | Tangerang Selatan, Indonesia (Remote) — Freelance Backend Developer

July 2023 – April 2025

- Managed and optimized MySQL database schemas to ensure data integrity and efficient query performance.
- Developed features for Bot Ticket resulting in Easy to order.
- Implemented clean code principles to maintain code readability and simplify future maintenance.

GMEDIA | Semarang, Indonesia — Quality Control Intern

December 2022 – April 2023

- Conducted rigorous manual testing on web applications to identify bugs, ensuring high-quality software delivery.
- Documented and reported defects clearly to the development team, facilitating faster bug resolution.
- Ensured applications met functional specifications before deployment phases.

PROJECTS

Marketplace Item In-Game | Tech Stack: TypeScript, Golang, MariaDB

June 2025

- Developed a simple Marketplace for Minecraft Server featuring Payment Gateway and Admin Panel.
- Implemented synchronized data player for Website.
- <https://store.minesive.com/>

SKILLS

TypeScript, Go (Golang) Framework & Libraries	Databases SQL Docker, Linux, Git	System Scalability Database Optimization
--	-------------------------------------	---

EDUCATION

Universitas Dian Nuswantoro | Semarang, Indonesia — Computer Science (S1)

September 2024 – Present

- Relevant Coursework: Web-Based Programming, Fundamentals of Programming, Algorithms & Data Structures, Database Systems.

SMK Ibu Kartini | Semarang, Indonesia - Rekayasa Perangkat Lunak

July 2021 – Juny 2024

- Relevant Coursework: Web-Based Programming, Fundamentals of Programming, Fundamentals of Design System.
