

FAJAR AZIZ KURNIAWAN

FULL STACK DEVELOPER

Semarang | jrzfjr5@gmail.com | jariz.my.id | LinkedIn | GitHub

SUMMARY

Fullstack Developer experienced in building fast, scalable systems using TypeScript (NestJS, Next.js, Nuxt.js, React.js) and Golang (Gin, GORM) alongside modern data layers. Freelance and professional background delivering reliable end-to-end solutions, from database design and API architecture to deployment with Docker and Git.

WORK EXPERIENCE

Logika Data | Semarang, Indonesia — Full Stack Developer

December 2025 – October 2026

- Developed and maintained fullstack web applications using Next.js (frontend) and NestJS (backend), delivering scalable business solutions for MSMEs (UMKM).
- Designed and managed relational databases using MariaDB and PostgreSQL for reliable storage and efficient query performance.
- Built and enhanced a Point of Sale (PoS) system to streamline transaction processing and sales reporting for retail clients.
- Developed a backoffice management system for inventory, order tracking, and operational administration, improving business process efficiency.

Raznar | Tangerang Selatan, Indonesia — Full Stack Developer

July 2023 – December 2025

- Integrated payment gateways (Midtrans/Xendit) to support secure online transactions.
- Built a buying-and-selling website with Next.js and Golang, integrated with the Tripay payment gateway.
- Managed and optimized MySQL database schemas to ensure data integrity and efficient query performance.

GMEDIA | Semarang, Indonesia — Quality Assurance Intern

December 2022 – April 2023

- Conducted manual testing on web applications and documented defects to ensure software quality prior to deployment.

PROJECTS

CMIS — Construction MIS | Tech Stack: TypeScript, Next.js, NestJS, PostgreSQL

April 2026

- Built a full-stack Construction Management Information System covering project tracking, RAB budgeting, purchase orders, invoices, and cashflow.
- Implemented role-based access control and financial reporting features to support multi-level user permissions across project teams.

PoS Pembangunan Web | Tech Stack: TypeScript, Next.js, Express.js, MariaDB

December 2025

- Developed stock opname and master data management modules to keep inventory records accurate and up to date.
- Designed a KPI dashboard with financial reports, giving management real-time visibility into store performance.

Marketplace Item In-Game | Tech Stack: TypeScript, NextJS, Golang, MariaDB

June 2025

- Developed a simple Marketplace for Minecraft Server featuring Payment Gateway and Admin Panel.
- Implemented synchronized data player for Website.
- https://store.minesive.com/

SKILLS

HTML5	JavaScript	Node.js	Express	Git	PostgreSQL
React	Next.js	Nest.js	Nuxt.js	TypeScript	TailwindCSS
Prisma	Docker	Golang	Gin	Gorm	MariaDB / MySQL

EDUCATION

Universitas Dian Nuswantoro | Semarang, Indonesia — Computer Science (S1)

September 2024 – Present

SMK Ibu Kartini | Semarang, Indonesia - Rekayasa Perangkat Lunak

July 2021 – June 2024

ORGANIZATION

Dinus Open Source Community | Semarang, Indonesia — Universitas Dian Nuswantoro
